

# FACILITIES MANAGERS' COMPLIANCE CHECKLIST

## Anchor Points and Lifelines

### Documentation

Is there an anchorage plan or layout?

YES / NO

Is there a user manual?

YES / NO

### Access

Can you safely access the anchor point / lifeline system?

YES / NO

Is the system suitable for the required task(s) (e.g for plant access, gutter cleaning)

YES / NO

Are there fall hazards on the path to the system? (e.g voids, laserlite)

YES / NO

### Inspection criteria

Is each anchor / line individually tagged?

YES / NO

Has the system been inspected in the last 6 months (WA), 12 months rest of AUS?

YES / NO

Has the parent structure been inspected for modification or deterioration (eg roof sheet). NB: This might lead to loss of anchor strength.

YES / NO

Are all penetrations sealed?

YES / NO

### Anchor point specific

Have drilled-in anchorages such as friction or glued-in anchors been proof tested?

YES / NO

Have anchors been inspected for signs of deterioration? (e.g rust)

YES / NO

Does the anchor feel rigid?

YES / NO

### Lifeline specific

Is there evidence of wear, cuts, looseness, extension, corrosion, stiffness, brittleness or fraying on steel cable?

YES / NO

Can mobile attachment devices fluidly travel the entire length of the cable / line?

YES / NO

Is there a presence of contaminants on the cable / line?

YES / NO

DID YOU ANSWER **NO** TO ANY ELEMENT OF THE CHECKLIST?
